Title: A Laptop DrawerDrop

CLAIMS

1. I claim as my invention the Laptop DrawerDrop which is a platform constructed to use the existing desk to provide a temporary, safe work surface on which to place a laptop in order not to occupy valuable desktop workspace or take up additional floor space.
2. I claim this invention is easily used by left or right handed persons.
3. I claim there is no assembly and no tools are required, choose which side of the desk to use, open the top drawer, drop in the DrawerDrop.
4. I claim the length of the unit that extends from the desk body over the opened drawer to the drawer face is nestled beneath the overhang of the desktop to prevent it from being bumped off vertically.
5. I claim The depth provides sufficient area for the laptop and an area for those who prefer to use a mouse.
6. I claim the strips that run the length of the underside and straddle the drawer side panels or fit inside of them (depending on the size of the drawer) provide stoppage to prevent the unit from slipping off any side.
7. I claim the design can be manufactured out of wood, leather, or polymers.
